Radiative Waste Section. In addition to interconnection with all the other areas already mentioned, this section even had information relating to major transportation and military facilities near waste storage sites.

Bruce Boger informed me you are both reviewing NRR material on the website for any information you believe could be vulnerable from a security standpoint. Thanks for your help. Barry Mendelsohn is reviewing the NMSS pages for similar information. As a reminder, this is a **high** priority project assigned directly by the ET at the Operations Center, therefore please complete this task as soon as possible. Please immediately forward any site addresses to me that you believe might pose some problems and I will bring them to the ET's attention.
