Mr. George B. Brown
District Geologist
Spokane District Office
U.S. Department of the Interior
Bureau of Land Management
East 4217 Main
Spokane, Washington 99202

Dear Mr. Brown:

As discussed by telephone on April 20, 1987, to my knowledge there are no proprietary or other restrictions placed on either the use or reproduction of Curtis Canard's "diagrammatic cross section showing subsurface faulting at the BWIP." Mr. Canard is affiliated with the Council of Energy Resource Tribes (CERT), consultant to the Nez Perce Tribe and the Umatilla Indian Nation. Certainly feel free to provide this document to the State of Idaho in response to a FOIA request.

As discussed, attached is a copy of the Department of Energy's letter of March 17, 1987, to John Linehan of the NRC. This letter includes DOE's review of Mr. Canard's interpretations as shown on the "diagrammatic cross-section."

Sincerely,

ORIGINAL SIGNED BY

Harold E. Lefevre, Project Manager
Technical Branch
Division of High-Level Waste Management
Office of Nuclear Material Safety
and Safeguards
