REPORT (PLASAR)

The Division of Low-Level Waste Management and Decommissioning (LLWM) has recently completed a review of the subject report, related to an alternative method of LLW disposal. The report was developed by the DOE and was made available to the States and interested parties by DOE, at the time of its submittal to the NRC for review, in November 1988.

LLWM is transmitting the results of our technical review to Dr. Joseph A. Coleman of DOE. Enclosed is a copy of the products of that review. We would be pleased to brief the Committee on this subject at its convenience.
