Subject: Fwd: Re: Change in Public Availability for Emergency Plan Documents

Wayne,
a question has come up again with regard to the correct processing of Emergency Exercise Scenarios under the old rules - pre 9/11 - they were withheld from public disclosure until after the Drill Date had passed

after 9/11 - their sensitivity level was unclear (like EIPs)

we were eventually given the go ahead to process Emergency Implementing Procedures as publicly available (unless otherwise marked as sensitive)

does the same now apply to the Exercise Scenarios (post Drill date)?

thanks

this is what I rec'd from Wayne regarding EIPs....I guess we should "hold" them for awhile until we get a clarification on how to process them and Emergency Exercise Scenarios

release

From: Wayne Davis } CIO
To: Collins, Michael }
Date: Tue, Oct 2, 2001 9:45 AM
Subject: Re: Change in Public Availability for Emergency Plan Documents

Mike,

Not yet. They (EDO) are still reviewing that specific document type. However, we expect that we will also be changing these.

>>> Michael Collins 10/02/01 09:13AM >>> CIO
do we include Emergency Implementing Procedures in the types of documents to be withheld as sensitive?

>>> Wayne Davis 10/1/01 4:00:52 PM >>> CIO
Effective immediately, any document that we would normally process and profile in ADAMS using the following two document types;

1. Emergency Plan, Amendment (10CFR50.54e and Part 21)
2. Emergency Preparedness-Emergency Plan;

are to be profiled as **"Non-Publicly Available"** and **"Sensitive."** Please modify our document handling procedures to reflect this change.

Notification to NRC staff should be coming out soon from the EDO's office.

THANKS
