That's fine. Lets get it out on the web we can touch base with Fire Protection after the fact regarding the NEI, EPRI, etc. links given the sensitivity.

Carl, Sally -

Unless you can link to specific sections of IEEE, NEI, and EPRI sites related to fire protection, there is little justification to include them here as exit links. Why not just say that we worked with these organizations and not link to their sites? We need to very careful of linking to NEI and EPRI because others will want us to link to their sites.

Otherwise what you have looks OK. Remember to add these links to Reactor Quicklinks and Operational Experience.

CONTR

The content owners of the Fire Protection site have reviewed and approved the following pages for this upcoming release, they made some minor editorial changes, please review and let me know if there are any changes.

The pages can be reviewed at the following URL:

<http://nrcweb.nrc.gov:300/reactors/operating/ops-experience/fire-protection.html>

Thanks
Sally Jewell
