Mr. Lyall Johnson, Licensing,
U.S. Atomic Energy Commission
Washington 25, D. C.

Subject: License to handle Radioactive Materials #37-2416-2

Dear Mr. Johnson:

Under date of 31 October 1960 we wrote you asking that you do whatever necessary to have the Curtiss-Wright License extended to cover our facility in Albuquerque. This request was made since Sandia Corporation has asked us to assemble some nuclear cells containing Krypton 85 into a battery assembly.

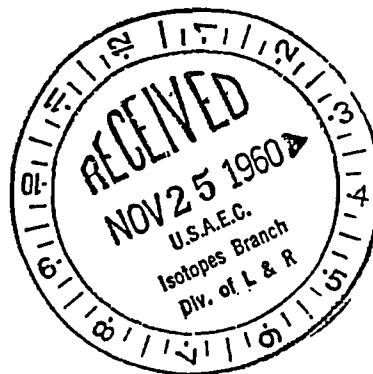

We have heard nothing from you to date and will appreciate your taking care of this and advising us at an early date.

Very truly yours,

CURTISS-WRIGHT CORPORATION
Electronics Division
