U.S. Nuclear Regulatory Commission
Document Control Desk
Washington, DC 20555-0001

REFERENCE: SNM-2500
Docket 72-1
TAC No. L23091

SUBJECT: SNM-2500 License Amendments 10 and 11

With receipt of this notice, GE Morris Operation withdraws proposed Amendments 10 and 11 to license SNM-2500 from review. A replacement amendment, Amendment 12, will be prepared and submitted for review. The new amendment will change the original licensing basis to delete structures, systems and components that are no longer required for GE-MO safe operation. This change will be accomplished by incorporating applicable portions of Amendments 10 and 11 as well as including changes identified and developed through the GE-MO license renewal application review process. Full technical justification for the changes will be submitted with the new amendment.

The GE-MO Consolidated Safety Analysis Report will also be revised in keeping with the license amendment, removing all structures, systems and components that are no longer required for GE-MO safe operation.

Sincerely,

E. W. Secko
Regulatory Compliance Manager
GE Morris Operation
