

Statement of Work
Theodor Krauthammer
June 15, 2001

Provide technical assistance to CNWRA staff in the review and, if necessary; in conducting independent analysis of structural, geotechnical, and seismic aspects of surface and subsurface facilities of repository program; SFPO projects; MOX project; and other relevant projects; as applicable. The assignment will include technical review of applicants' documents, preparation of request for additional information, conducting independent analysis whenever necessary, preparation of review/analysis reports including assessment reports and safety evaluation reports, and provide expert witness in hearing, if necessary.
