

Statement of Work

Diane R. Smith

April 30, 2001

Dr. Smith will be available for potential work at the CNWRA in the Geosciences area. She may be utilized as a Technical Specialist for the CNWRA annual audit or as a technical component in the area of surveillances.

Dr. Smith has maintained her qualifications and her capabilities and has performed well for the CNWRA as a Technical Specialist in the past audits.

Her work normally is less than 100 hours per year and we would want her available for the entire year period since we don't always lock down the audit until late and there may be other uses for her at the CNWRA in a surveillance capacity.
