

STATEMENT OF WORK

Clifton Ladd

March 1, 2002

Mr. Ladd will participate with CNWRA staff in multidisciplinary teams to review and prepare environmental documents related to NRC implementation of National Environmental Policy Act (NEPA) requirements. His focus will be on those areas in biology and ecology where CNWRA does not have staff expertise. Depending on the type of tasking from NRC, Mr. Ladd may conduct literature and data searches, review materials provided by the NRC and its licensees, conduct site visits, and participate in public meetings related to NRC environmental activities. As necessary, he will document his work and provide the CNWRA project manager with written reports that will be used as a partial basis for CNWRA deliverables to NRC. As part of this work, he may be asked to visit CNWRA offices in San Antonio, TX or NRC headquarters in Rockville, Maryland.
