

MEMORANDUM

March 7, 1989

TO: Conflict of Interest Committee Chairman

FROM: John P. Hageman, Manager   
Transportation, Special Projects, and Analytical Evaluations

SUBJECT: Element Cover Letter/Memo to the COI Management Committee

Attached is the completed Center Questionnaire for Preliminary Evaluation of Potential Conflict of Interest form and the signed letter from Art Greenberg attesting to the belief that he is free from COI.

The proposed work assignment for this individual includes the following:

Work will primarily be on review of long and short term planning and planned activities related to the HLW Program. Identification of currently planned activities versus unplanned events and the risk associated with these unplanned events will be done. Follow on work will include risk management and risk reduction alternatives.

The impact of not using Art Greenberg would be that work in the TSPAE Element would be delayed. An alternative would include finding and contracting an alternative resource. After review of Mr. Greenberg's experience and resume, I have found that he is capable of performing the required activities.
