United Aircraft Corporation
Pratt & Whitney Aircraft
East Hartford, Conn.

13 May 1968

Received a phone call from Donald MacFarlane of Pratt & Whitney. He informed the inspector that they had received 16-18 Kilo curies of material on April 9, 1968 for the production of ^{60}Co sources from the pellets of the material on hand. Present inventory is about 15 KCi. of ^{60}Co . They have shipped two sources for teletherapy units, another source is ready for shipment and 10 KCi. is to be used Swan irradiator. All the work is done in one cell.

MacFarlane stated that Jim Glyn of Licensing visited the plant to see the operations. This is in reference to an application for a broad license. He also stated that the company is applying for an increase in the quantity of ^{60}Co to 50 KCi and ^{137}Cs to 30 KCi.
