Subject Compliance of CMs for Facility R-126

Dear Mr. Mendonca:

Attached is the description on how the University of Utah (Facility R-126) is complying with the NRC-recommended site-specific compensatory measures (CM) for physical security of reactors licensed at less than 2 Mw.

The last paragraph of Section B was modified to read:

“The CENTER’s access authorization program ensures that individual’s identity, nationality, immigration status, and character/reputation be verified for those with unescorted access privileges to the facility. All other individuals are appropriately escorted and monitored when visiting the facility.”

Respectfully,

David M. Slaughter, Ph.D.  
Reactor Administrator, Facility R-126
