SUBJECT: U. S. NUCLEAR REGULATORY COMMISSION ON-SITE LICENSING REPRESENTATIVES' REPORT ON YUCCA MOUNTAIN PROJECT FOR JULY 1997

The purpose of this letter is to transmit the U.S. Nuclear Regulatory Commission On-Site Representative's (OR's) report for the period of July 1-31, 1997.

The principal purpose of the OR reports is to alert NRC staff, managers and contractors to information on U. S. Department of Energy (DOE) programs for site characterization, repository design, performance assessment, and environmental studies that may be of use in fulfilling NRC's role during pre-licensing consultation. The principal focus of this and future OR reports will be on DOE's programs for the Exploratory Studies Facility (ESF), surface-based testing, performance assessment, data management systems and environmental studies. Relevant information includes new technical data, DOE's plans and schedules, and the status of activities to pursue site suitability and ESF development. The ORs also participate in activities associated with resolving NRC Key Technical Issues (KTI). In addition to communication of this information, any potential licensing concerns, or opinions raised in this report represent the views of the ORs and not that of NRC headquarters' staff.

During this reporting period, the OR obtained clarification on issues pertaining to supplier evaluation, review and technical adequacy of technical reports, the graded approach to quality assurance, and the recent transition of the DOE quality assurance function.
