MAJOR TASK:

Obtain information on plant status to support dose projections, protective action recommendations, event classifications, and information dissemination.

SPECIFIC TASK:

HOW:

1. Log in upon arrival.

2. Notify the Recovery Manager of your arrival.

3. Provide Engineering Support to the EOF Staff.

- 1a. Sign Ingress/Egress Log located at the entrance into the EOF.

- 1b. Clip-on the position specific name badge.

- 1c. Sign-in on board in conference area if you are the initial responder.

NOTE:

If the Recovery Manager is delayed in arriving at the EOF, prepare the facility for turnover, (reference EP-PS-200, Recovery Manager Emergency-Plan-Position Specific Instruction), but do not accept turnover until his arrival.

- 3a. Only the Engineering Support Supervisor is required for EOF activation.

- 3b. Obtain required engineering information from the TSC until arrival of additional engineering staff in GO/EOF.

- 3c. The following personnel are desired within 90 minutes:
 - (1) Systems Lead Engineer (EOF AND GO)
 - (2) Fuels Lead Engineer (EOF AND GO)
 - (3) Mechanical Engineer (EOF)
 - (4) Electrical Engineer (EOF)

PCAF

SPECIFIC TASK:

HOW:

-
- | | | | |
|----|-------------------------------------------------------------------------------------------|-----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 4. | Determine readiness of Engineering Support Staff to support EOF functions for this event. | 3d. | Call the General Office if you are the initial responder. (Conference bridge telephone line may be used.) |
| | | 3e. | If additional support is required, request the EOF Support Supervisor or NEP Duty Planner to obtain needed disciplines. |
| | | 4a. | Verify engineering equipment is operational (phones, PICSY terminals, network terminals, Fax machine, etc.). |
| | | 4b. | Brief Engineering Support Staff as time permits. (Staff can be briefed after EOF activation.) |
| 5. | Obtain sufficient knowledge of event to allow assumption of duties. | 5a. | Review data posted in the Command and Control, Site Support, and Engineering Support areas. |
| | | 5b. | Obtain event information from Recovery Mgr., TSC, or other accurate source.
Ensure knowledge of:
(1) Affected Unit
(2) Emergency Classification
(3) Any Protective Action Recommendations
(4) Source term size
(5) Release flowpath
(6) Review and understand status of unaffected unit. |

PCAF

SPECIFIC TASK:

HOW:

6. Perform turnover of notification of DEP/BRP Technical from the TSC Engineering Staff to the EOF. (This can be done at any time but is REQUIRED at first notification after TSC/EOF turnover).

6a. Contact the TSC Tech Support Coordinator and obtain time that next notification is due. Accept responsibility for next notification of DEP/BRP Technical. (REQUIRED at first notification after TSC/EOF turnover).

6b. DEP/BRP communications are due hourly.

6c. Transmit information from the ENR form.

6d. Review anticipated questions list in anticipation of briefing

7. Maintain ongoing awareness of plant status.

7a. Ensure an ongoing awareness of at least the following:

- (1) Status of Reactivity control
- (2) Decay heat removal
- (3) Backup heat removal capability
- (4) Integrity of fuel cladding; Rx vessel, primary containment, and secondary containment
- (5) Hydrogen generation
- (6) Status of rad release

8. Review plant status with the Recovery Manager. Assist in classification and reclassification of the event, and in determining the need for Protective Action Recommendations.

8a. Assign personnel to trend the following data, immediately advise you of significant changes:

- (1) The release path:
 - a. Barriers breached
 - b. Barriers threatened, (no decay heat removal, over pressurization, etc.)
 - c. Mitigation in progress
- (2) Source term
 - a. Type and amount of fuel damage
 - b. Mitigation in progress
- (3) Present classification and bases
 - a. Potential for upgrade

PCAF

SPECIFIC TASK:

HOW:

9. Establish/maintain an Engineering Support Priorities List.

9a. Assign a staff member to maintain a list of Engineering Support "Priorities" utilizing the "white boards" or easels in the Engineering Support Office, including:

- (1) initial time
- (2) disposition (open/closed)
- (3) time of closure

10. Establish/maintain a list of current/concurrent EAL's.

10a. Ensure Tracking of concurrent EAL's at all Emergency levels

10b. Monitor plant conditions on an ongoing basis so that concurrent EALs can be assessed continuously. It is the intent of this step that concurrent EALs be identified in real time and not at a later time in the emergency.

NOTE: THE INFORMATION ON CONCURRENT EALS IS REQUIRED SO THAT THE RECOVERY MANAGER AND THE EOF CAN DETERMINE IF THERE IS A CHANGE IN RADIOLOGICAL RELEASE STATUS. IT IS ALSO REQUIRED SO THAT COMMUNICATIONS WITH THE OFFSITE AGENCIES CAN BE AS ACCURATE AS POSSIBLE.

10c. Provide information to the Recovery Manager for downgrade discussions.

11. Update Recovery Manager as new information becomes available.

11a. Brief Engineering Support Staff personnel to:

1. Advise you immediately if they become aware of information that could change the Emergency Classification or PAR.
2. Advise you immediately if you provide information believed to be incomplete or inaccurate in a briefing.
3. Use three-part communications during exchanges of critical information.
