

March 31, 2004

PARTICIPANTS: Boiling Water Reactor Owners Group (BWROG) and Nuclear Energy Institute (NEI)

FACILITIES: Grand Gulf, Clinton, River Bend, Perry, McGuire 1 & 2, Catawba 1 & 2, D.C. Cook 1 & 2, Sequoyah 1 & 2, and Watts Bar

SUBJECT: SUMMARY OF THE FEBRUARY 3, 2004, MEETING WITH THE BOILING WATER REACTORS OWNERS GROUP (BWROG) AND NUCLEAR ENERGY INSTITUTE (NEI) REGARDING RECOMMENDATIONS FOR RESOLVING GENERIC SAFETY ISSUE (GSI) 189, "SUSCEPTIBILITY OF ICE CONDENSER AND MARK III CONTAINMENTS TO EARLY FAILURE FROM HYDROGEN COMBUSTION DURING A SEVERE ACCIDENT"

On February 3, 2004, the U.S. Nuclear Regulatory Commission (NRC) held a public meeting with the BWROG and NEI at NRC's Headquarters in Rockville, Maryland, to discuss the resolution of GSI-189.

The topics discussed included the following:

- recent regulatory action on GSI-189
- portable versus pre-staged backup power supplies
- need for backup power supply design criteria
- timing for activating hydrogen igniters
- alternatives to rulemaking
- benefits and costs

Industry representatives suggested that the NRC should consider alternatives for resolving GSI-189 and not lock into any one solution. A possible alternative would be to use the Division III diesel generator associated with the high-pressure core spray pump in Mark III containment plants. The NRC staff indicated that it was not committed to a pre-staged diesel generator and would consider options while evaluating the feasibility of developing a performance-based rule. The NRC staff further clarified that the Industry should show that the Division III diesel generator would be available in a large fraction of the station blackout (SBO) core-melt accidents if the Industry wanted to consider this diesel generator as an alternative power source. The BWROG agreed to review plant-specific probability risk assessments for Mark III containment plants to determine diesel-generator availability in SBO core melts. The NRC staff agreed to do similar reviews of Mark III SPAR models. The Industry and NRC agreed to meet again in March 2004 to talk about design criteria for the backup power supplies and discuss schedules for resolving GSI-189.

The Union of Concerned Scientists representative said that the NRC and the Industry need to mitigate risk and provide adequate protection. He further pointed out that progress is being made to resolve this GSI, but it is being made too slow.

Three NRC Public Meeting Feedback forms were received. Comments included the following:

- The NRC had the right staff at the meeting - this will help going forward.
- Overall, a good positive meeting.

These have been forwarded to the Office of the Executive Director for Operations

Enclosure 1 is the NRC's Meeting Agenda. Enclosure 2 is the NRC's Handout. Enclosure 3 contains the Industry Handouts. Enclosure 4 is the List of Attendees.

Please direct any questions to L. Mark Padovan at 301-415-1423, or LMP@nrc.gov
