SUBJECT: CORRECTION OF LICENSE AND TECHNICAL SPECIFICATIONS FOR
COMANCHE PEAK STEAM ELECTRIC STATION (CPSES), UNITS 1 AND 2
(TAC NOS. MC1502 AND MC1503)

Dear Mr. Blevins:

The purpose of this letter is to provide you with the results of the U.S. Nuclear Regulatory Commission (NRC) staff review of the license and technical specifications (TSs) for the subject plant. The NRC is conducting a comparison of its license authority files to licensees' records to ensure errors in licenses and TSs are identified and corrected for all units. I have completed the comparison of the NRC's license authority file and your records to determine whether corrections were necessary. The enclosure provides the information necessary to update your records for CPSES Units 1 and 2, so that the license and TSs accurately capture the NRC-approved amendments or corrections to these documents. I have discussed the corrections that are necessary with Messrs. Fred Madden and Carl Corbin of your staff.

Included in the enclosure are copies of (1) the cover-pages of the letters transmitting the license amendments and a correction letter, (2) insert/remove instruction pages for incorporating the correct pages, and (3) correct license and TS pages. Please follow the instructions on the insert/remove pages when incorporating these corrections. Please have a member of your staff inform me when the corrections have been incorporated into your records or if there are questions or comments on the requested action. I can be contacted at 301-415-1476.

Sincerely,

/RA/
