Bill,

I have answers for the questions you presented to OPA2@nrc.gov in your e-mail dated 3/17/2004.

I found the following items which may be the non-proprietary documents you are looking for in ADAMS (Wesdyne's non-proprietary report). Each one is a different version of the base topical report WCAP-15783-P, since the submissions were at various times by Westinghouse.

ML021080593 dated 4/15/2002
ML031040322 dated 4/10/2003
ML032721358 dated 9/25/2003

The proprietary versions of the documents are not publicly available, so noone outside of the NRC would have access to the proprietary versions. Westinghouse or Wesdyne may have their own capability to share information, but not via our website.

Finally, If a utility wanted to use their evaluation methodology the NRC would have to review it.

If you have any further questions feel free to call me at 301-415-3764.

Sincerely,
Brian Benney

Bill,

I didn't catch your phone number yesterday. Can you send me an e-mail with your phone number so I can contact you for further information.

Brian

Simon Sheng no longer works in the section that would evaluate these types of reports.

He recommended I contact the section chief, Terrence Chan. Don't know if I should be calling a section chief.
