Mahendra,  
 they are included now.

 Bernie:

In the topics for the structural breakout session, please include the computer codes validation and uncertainty analyses. Thanks.

Mahendra

 I have worked on and attached my idea of a tentative agenda. Please review it and provide any comments to me so that I can send it to SNL later today.

thanks

I agree with Bob's suggestion. This way each of us will have an overall understanding of the status, and how each piece fits into the whole picture, and who needs to do what to complete the picture. I believe we will all fly on Tuesday afternoon. Thanks.

 RTA Group,

Bob and I just had a discussion about the agenda for our trip to SNL. Bob's suggestion was that we devote Wed morning to an overview of the whole project, start to finish. then we break out on Wed afternoon and Thursday morning with our technical counterparts. then we conclude the discussion Thursday afternoon with another general session to see where we are, in response to our specific technical discussions.

Thoughts on this ??????

 Bernie:

It appears that the structural personnel could still fly out on Wednesday AM, and attend the remaining parts of the two-day agenda, because the Wednesday morning session is primarily on radiological consequences. The start time for the Wednesday afternoon meeting could be changed to 2:00 PM by delaying lunch to 12:30 PM. Thanks.
