Subject: Re: Change to Meeting Location

Guess what,

You have as much information as I.

I assume that we will need to understand the assumptions industry made in their calculations.

At some point the Commission will have to respond to Congress (public and industry) if we agree or disagree with the industry's analyses.

These questions have already been raised.

Listen to the industry's presentations, ask questions, if needed, to understand what they did.

Following the meeting, please summarize (in a memo to files) their assumptions, analyses and results, as they related to dry storage and transportation.

Beth, if the industry discusses radiological consequences, try to understand their methods and results. Following the meeting, summarize (in a memo to files) their assumptions, analyses and results, as they related to dry storage and transportation.

Thanks,

Jack.

Jack:

Can you send me some information on the meeting? Is it the one on Thursday with NEI/EPRI on vulnerability issues? Ron told me about the meeting this morning. Thanks.

Mahendra

Mark,

From SFPO, I would like to send the following individuals to the meeting:

Jack Guttmann  
Robert Shewmaker  
Mahendra Shah  
Stephanie Bush-Goddard  
Wayne Hodges  
Daniel Huang

Is that OK?

Jack.

A/54
