Subject: Sandia Draft report on ISFSI - Jetliner Impact analyses

Ann:

I wanted to let you know that we have received a draft report from Sandia on the Jetliner impact analyses for a ISFSI storage cask. We are going to transmit our comments to Sandia today. The final report will probably be issued by November 18, 2002.

I discussed the content of the report briefly this morning with Roger Kenneally, and let him borrow a copy of the report for his information. Please let us know if you have any questions. Thanks.

Mahendra
