Subject: Re: Upcoming items for EDO and/or OCM from 2/10/03 - 3/21/03

here is our story,

The classified paper on spent fuel vulnerabilities studies. Marty asked us to slow down the paper. We did, the contract deliverables are due shortly. Staff needs time to review the contractors report and then to develop a commission paper that contains information from the contractors efforts. Based on the need to fill in a due date we are proposing a new due date of 4/30/2003 to NMSS and 5/6/2003 to the EDO.

Thanks
