

6-6-56 (IHR)

Call from Oscar Belharz, Pratt and Whitney, regarding Application Control No. 877 and a letter from NRC requesting information on instrumentation at the three areas where sealed sources are to be used. Also requested information on administrative radiological safety procedures. Sources are to be used at the Hartford, ARCO and Livermore sites. The instrumentation listed on the application is only for the Hartford group. Operations at ARCO will be under the direction of the Phillips Co. Health Physics Department. Operations in Livermore will be under the Health Physics Group at that location. Mr. Belharz is forwarding information on radiological safety procedures.
