FROM : E. R. Fleury

SUBJECT: CURTISS-WRIGHT RESEARCH REACTOR - APPLICATION FOR LICENSE

On November 5, I called Dr. C. J. Roberts, Curtiss-Wright Corporation, Research Division, Quehanna, Pennsylvania, regarding the "Official Use Only" classification on the Preliminary Hazards Evaluation Report submitted as a part of the application for license to construct and operate a research reactor.

I pointed out to Dr. Roberts that the "Official Use Only" classification was a Government classification and requested information as to whether this document was to be considered company confidential. Dr. Roberts called me back on November 7, and advised that Curtiss-Wright wished this document to be considered as company confidential. I advised Dr. Roberts of the provisions of 10 CFR Part 2 and specifically Section 2.790. He indicated that their primary reason for withholding this information from public inspection was the preliminary nature of the information presented. I told him that this did not appear to be adequate justification for withholding the document from the Document Room, but told him to submit a specific request citing their reasons.

Dr. Roberts called me back later on this date to advise that Curtiss-Wright personnel had decided to withdraw the "Official Use Only" designation and not to request that the document be withheld. He will confirm this decision by letter.

In view of the above, the "Official Use Only" designation can be cancelled and the report placed in the Document Room.
