April 16, 1958

Mr. H. L. Price, Director
Division of Civilian Application
U. S. Atomic Energy Commission
Washington 25, D. C.

Dear Sir:

A final inspection by the Atomic Energy Commission of the Curtiss-Wright Corporation's Nuclear Reactor Building was made in the latter part of February and a notification of an intention to issue a license for the operation of the Reactor was published in the Federal Register on Saturday, April 12, 1958. Based upon a temporary regulation of the Atomic Energy Commission, Section 140.11, we are insured in the sum of \$250,000.00 at the present time. Since it is expected that our license to operate the Reactor will be issued within approximately 15 days after the publication in the Federal Register, would you be kind enough to inform me as to whether we are automatically covered under Section 140.17 of 10 CRF Part 140 entitled "Financial Protection Requirements and Indemnity Agreements" or whether there is some positive action we must take to be the recipient of an indemnity agreement with the Government.

I would appreciate your prompt advice in this matter.

Very truly yours,

CURTISS-WRIGHT CORPORATION
