Washington, D.C. 20852-2738

Attention: Chief, Information Management Branch
Program Management
Policy Development and Analysis Staff

Subject: Revision to MELLA+ RAI 24 (TAC No. MB6157)

By Reference 1, the NRC revised their request for addition information (RAI) number 24. That RAI addresses the reactor safety performance evaluations of Licensing Topical Report (LTR) NEDC-33006P, *Licensing Topical Report NEDC-33006P, Revision 1, "General Electric Boiling Water Reactor Maximum Extended Load Line Limit Analysis Plus."* GE has reviewed the revised RAI and determined that the revision does not alter the response provided by Reference 2.

If you have any questions, please contact, Mike Lalor at (408) 925-2443 or myself.

Sincerely,

George Stramback
Manager, Regulatory Services
GE Nuclear Energy
