April 5, 2004

Mr. George Stramback Regulatory Services Project Manager GE Nuclear Energy 175 Curtner Ave San Jose, CA 95125

SUBJECT: REQUEST FOR WITHHOLDING INFORMATION FROM PUBLIC

DISCLOSURE (TAC NO. MB5705)

Dear Mr. Stramback:

By letter dated February 6, 2004, GE Nuclear Energy (GENE) submitted an affidavit dated February 6, 2004, executed by Ron Engel, Technical Lead, System Engineering, requesting that the information contained in the following document be withheld from public disclosure pursuant to Title 10 of the *Code of Federal Regulations* (10 CFR) Section 2.790.

"DSS-CD [Detect and Suppress Solution - Confirmation Density] TRACG Application"

The staff has determined that a nonproprietary copy of the document is not needed for placement in the NRC's Public Document Room or for addition to the Agencywide Documents Access and Management System Public Electronic Reading Room. This is only an outline and the final version of this document was provided on February 27, 2004, (MFN 04-019) with a non-proprietary version. In addition, we would not consider this document as "voluntary". It is in support of an existing review even though you considered it preliminary and for information only.

The affidavit stated that the submitted information should be considered exempt from mandatory public disclosure for the following reasons:

- a. Information that discloses a process, method, or apparatus, including supporting data and analyses, where prevention of its use by General Electric's competitors without license from General Electric constitutes a competitive economic advantage over other companies.
- b. Information which, if used by a competitor, would reduce his expenditure of resources or improve his competitive position in the design, manufacture, shipment, installation, assurance of quality, or licensing of a similar product.

On February 13, 2004, certain revisions of the NRC's regulations went into effect that renumbered 10 CFR 2.790 as 10 CFR 2.390. We have reviewed your application and the material in accordance with the requirements of 10 CFR 2.390 and, on the basis of your statements, have determined that the submitted information sought to be withheld contains proprietary commercial information and should be withheld from public disclosure.

Therefore, the information contained in the document entitled "DSS–CD [Detect and Suppress Solution – Confirmation Density] TRACG Application," marked as proprietary will be withheld from public disclosure pursuant to 10 CFR 2.390(b)(5) and Section 103(b) of the Atomic Energy Act of 1954, as amended.

Withholding from public inspection shall not affect the right, if any, of persons properly and directly concerned to inspect the documents. If the need arises, we may send copies of this information to our consultants working in this area. We will, of course, ensure that the consultants have signed the appropriate agreements for handling proprietary information.

If the basis for withholding this information from public inspection should change in the future such that the information could then be made available for public inspection, you should promptly notify the NRC. You also should understand that the NRC may have cause to review this determination in the future, for example, if the scope of a Freedom of Information Act request includes your information. In all review situations, if the NRC makes a determination adverse to the above, you will be notified in advance of any public disclosure.

If you have any questions regarding this matter, I may be reached at 301-415-1445.

Sincerely,

/RA/

Alan Wang, Project Manager, Section 2
