Subject: Rulemakings & Comments on Web Site

Bill:

I've attached a DRAFT table of rulemakings on the NRC's public web site. As I mentioned after today's meeting, I'm sending this so we can coordinate review of rulemakings and what should be on the web. My task is to make recommendations to ADM on what can be re-posted to the web site, what should be redacted, etc.

I marked the rulemakings according to which Office has the lead, according to what I could glean from the web site and our own, internal status tracking. If I've mistakenly associated any rulemakings with NRR, please let me know.

FYI: it appears to from our first cut, that 2/3rds of the NMSS rulemakings are not 'sensitive;' others we are not sure about until further analysis. Also, there's a bag of worms out there: guidance documents listed under item no. 8. This 'line-item' on the web site refers, in turn, to 43 guides of one sort or the other.

I'll look forward to hearing from you with comments.
