1. We are issuing letters to vendors/licensees to inform them that although we have met our previously published schedules for completing the technical review and CoC/SERs, we are delaying the rulemaking/issuance of these actions until we have completed the redaction effort to remove sensitive information from the documents. We are not committing to a completion date, but we are advising we will complete this activity as soon as we can.

2. We are proceeding to complete the PFS EIS and seismic SER. Our current plans are to issue the seismic SER by 12/2, issuing the protected unredacted version to the parties with OGC taking care of the protective agreement and Board coordination. The redacted version of the SER will follow the planned 12/21 protected version issuance, it will be issued no later than the redacted version of the EIS issuance. For the EIS we will issue a protected version by 12/31 with the redacted version to follow by about 1/11. This also we are coordinating with OGC and the Board, as well as the other agencies (BIA, BLM, STB).
