Subject: Review of NUREGs for Sensitive Info

In response to your request for NMSS to review NUREG/CR-0743 and -0744 prior to release to a member of the public, I have reviewed these documents for sensitive information. I based my review on the guidance proposed to the Commission in a December 5, 2001, memo from the EDO regarding release of information to the public.

I have concluded that these two documents contain sensitive information and should not be released to the requester.

I will place the library copies of these documents in the outbox at O5-E14 for your pickup.

Please let me know if you have any questions.

Thanks,

Steve
