jul 9*

See attached IRO guidance in preparation for re-posting event reports on the web (which won't occur until the general guidance is approved). Similar guidance could probably be used for the Regions when they originate PNs.

**Subject:** Draft IRO Criteria for evaluating releasability of event reports

Mindy,

As we discussed. Attached is a preliminary copy of our analyses of event reports, and the criteria we developed, based on that analysis, which we could apply to a releasability determination.

It is preliminary, and will remain so until a Commission determination on the restoration of the public's access to such information (and any revised Commission/staff criterion) on the Web is made. However, as I mentioned, this logic may readily apply to PN's that are generated by the Regions/HQ Program Office (that historically were sent to NRR Events Assessment for web posting).

Tim
