Subject: Security Fence Photographs

Hello Glenn:

I was in ADAMS this morning. I came across a 29-page document titled "Photographs of the Nuclear Fuel Services Inc. Erwin Plant Site" (accession no. ML00377209, dated November 20, 2000). This document contains about two dozen full page photographs of the security fences, security gates, security building, and security lighting, and security cameras around the nuclear facility in Erwin, TN.

The photographs are very clear and very informative. So informative that the document title really should be "Terrorist Blueprint."

I understand that you are not responsible for fuel cycle facilities such as Erwin. But if you could forward this message along to your counterpart in NMSS so that this document could be rescreened for safeguards information and whether it should be available on the internet, I'd appreciate it.

Thanks,

Dave Lochbaum
