Subject: OHS v. SRM

I am enclosing the strawman that we discussed this morning. I would propose holding this document for now, until we have considered the comments from all of you. Similarly, when we pitch it to the larger group, I propose that we offer only the definition (and examples, yet to be created) and not all the discussion behind it. That would ensure that the group would focus on the definition and not all the minute details of the guidance.
