Subject: Re: Hydrogen Storage

Bill,

It's my understanding that you are on the team for determining what information needs to be put back on the web re: safeguards. I would like to meet with you, Dick Rosano, and Dennis Gordon to discuss where we're going with 73.21 and the determination of what is SGI.

Dennis G. - would you please set up a meeting this week, tomorrow if possible

Thanks,
Vonna

NSR release
The issue of how to classify hydrogen storage locations may come to a head quicker than we thought. Region III has instructed the residents to inform the licensees that the hydrogen storage info should be classified as safeguards information. Should we instruct the regions to hold off on that until we reach a consensus?
