Subject: REPOSTING DOCUMENTS ON THE PUBLIC WEB SITE

Stu Reiter's memorandum dated February 22, 2002, requested the Regions to review (from the list of document collections) and authorize reposting of certain information to the public web site. Specifically, the Regions were to comment on the acceptability of reposting Preliminary Notifications and Headquarters Morning Reports.

Region I has no specific objection to reposting these documents. However, we believe that NRR and NMSS (which "own" the Manual Chapters that describe the use of these reporting tools) should make the final judgement as to the acceptability of reposting.

Further, Mr. Reiter's request noted that the cost of reposting is a factor in the restoration decision. However, since we do not have information on the costs involved, we are not in a position to make an informed recommendation as to the scope of the restoration.

Please feel free to contact me if you have any questions.
