Tom

We pulled the paper copies of the Information digest off the shelf in the PDR reading room because of the Appendix A with the locations of power reactors. The volumes 11 and 12 are still in PARS. Were we over reacting by pulling it from the PDR? Has a determination been made for the Information digest, whether it can be given to the public or not?

Thanks!

Teresa

I don't think they were overreacting... they were just being cautious, which is a good thing. The CFO is reviewing the Info Digest now for changes, etc. In the meantime, we should probably remove it from PARS just to be safe.

Teresa poses a good question. Any guidance on this matter?
