Subject: RE: Request for documents

Tom,

Thank you for sending the attached. It is one of the documents I saw on your site and wanted to read. Wasn't there a document that discussed FileNet, integration, lessons learned, and the next version. I want to learn as much about FileNet implementation/issues in agencies before we move in that direction. Since EDMS and RMAs are expensive endeavors, we need to make sure that we consider all issues. Sometimes it is difficult job getting people to understand that you can not simply install software and it works. There is a lot of planning that has to occur first.

Gladys

Gladys...I'm Tom Smith, Acting Chief of the PDR. I believe I have what you're looking for...let me know if this is it.

A few months ago, you posted your action plan and other documents to continue/improve ADAMS. Last week those documents were not longer available. Could you email those documents to me? I am working on a project for a document and records management solution. It appears that FileNet and ForeMost solution are leading the other applications. Your progress and plans could help us as we continue to develop requirements and the business case. I would appreciate any information you could send me on ADAMS and a point of contact. I have left a voice for Jeffrey Main.

Thank you.
