**Subject:** nureg-1672

FYI

An NRC staffer came by and asked if this NUREG was in the PDR.

ACN: 9907210095  
DATE: 990531  
EST\_PAGES: 110  
L1: SAFETY EVALUATION REPORT RELATED TO THE DEPARTMENT OF ENERGY  
L2: ENERGY'S TOPICAL REPORT ON THE TRITIUM PRODUCTION CORE.  
FICHE: A8646:001-A8646:103  
PFL: ORG-EUSDOE-990531  
RPT: NUREG-1672  
PACKAGE: 990531-9907210095

It is in BRS. He asked if someone, like David Lochbaum, would make a request for it, would it be given to him. I told him we are screening requests for NUREGs and based on the title, if we think the information might be sensitive, we will have the report reviewed before letting it be copied for a requester.

From his concern, I think this one should be reviewed if a request is made for it.

Teresa
