Place: OPA@nrc.gov

I'll pass this on to the review group. Thanks

Joan

Thanks for the response, Joan.

I received a request from TVA for access to Standard Review Plan (SRP) Chapter 7 (Instrumentation and Control). The licensees use the SRP in preparation of their license amendment requests. In its review of these license amendment requests, the staff references the SRP guidance to justify its findings in its safety evaluation reports, which are available to the public. Consequently, removal of this important document from the public web site negatively impacts the public's ability to question NRC staff safety findings and the licensee's ability to ensure license amendment requests adequately address safety concerns.

Note that Chapter 7 does not deal with safeguards systems, only safety-related systems and systems important to safety in nuclear power plants and nonpower reactors. Expedient restoration of this part of the SRP is important to the nuclear power industry.

Thanks

Mike

Michael,

The former external site is still available internally to NRC Staff. The document you are interested in can be found on the former NRC Public Web site: <http://www.nrc.gov:201/> under Reference Library - Technical Reports:
<http://www.nrc.gov:201/NRC/NUREGS/SR0800/CH7/homepage.htm>

We are still awaiting approval to post externally. Please let me know if I can be of further assistance.

Joan Hoffman
