More Content Now Available on NRC Public Web Site

The OCIO is working with agency offices to incrementally post additional information at the public Web site (www.nrc.gov). We will keep you informed via Network Announcements as new content is added. The most recent additions to the site include:

- Our Mission
- Governing Legislation
- How to Contact Us
- Telephone Directory
- Contracting Opportunities
- How to Report a Safety Concern
- IG Hotline
- Regulatory Information Conference
- Electronic Reading Room (includes ADAMS, PDR, and FOIA)

Please note that not all links in these sites are active. Those that aren't lead to information still undergoing review.

In the meantime, the former public site continues to be available from the internal home page at www.nrc.gov:201 and document collections continue to be updated at that site for staff access.
