Subject: Press Releases for Tomorrow's Web

I have reviewed all our press releases from August 1 to the present and recommend reposting all of them to our website tomorrow. Only one press release (No. I-01-054) lists a specific address for a medical facility which we don't believe is a problem. All locations mentioned in the press releases to be reposted indicate the location of a facility as being located in or near a city or town. We also recommend posting the 9/28 press release (No. 01-112) on NRC's reaction to the terrorist attacks (even though it meets some of the "removal criteria") because the information in it has been repeated in the news and in conversations with reporters and in public hearings.

The press releases to be reposted are:

Headquarters: 01-096 through 01-121 (& any higher)  
Region I: I-01-049 through I-01-059 (& any higher)  
Region II: II-01-034 through II-01-041 (& any higher)  
Region III: III-01-042 through III-01-046 (& higher)  
Region IV: IV-01-042 through IV-01-047 (& higher)

Call me if you have any questions.
