Subject: NRR Safeguards Review Action List

Per my conversations with Mindy Landau, Fran Goldberg, and John Zwolinski, NRR will take the following actions to facilitate the effective and efficient restoration of the Agencies web holdings.

1.) All safeguards reviews, material classification, and disposition will occur only on official OCIO controlled web platforms.

2.) NRR will focus all review efforts at the following URL:

<http://nrcweb:303>

NRR will closely coordinate and communicate all review efforts with EDO and OCIO to ensure planned effective and efficient resource utilization.

3.) NRR will cross reference existing NRR safeguards review data with the Agency redesign site located at <http://nrcweb:303>.

The attached .pdf files contain the Approved and Dis-approved materials submitted for processing or removal from the redesign site.

4.) NRR will prioritize approved safeguards materials for processing and posting to the redesign site.

5.) Once all approved safeguards materials have been posted to the redesign site, NRR will perform a final safeguards review of the redesigned site (<http://nrcweb:303>) reactors site.

6.) Once all approved safeguards materials processing have been completed the redesign site will be posted for public access.

7.) In coordination with EDO and OCIO dis-approved NRR materials will be prioritized for a detailed safeguards review and editing. Materials considered appropriate after a detailed safeguards review and editing will be incrementally added on a planned and coordinated schedule to the public access web site.
