Sensitive Information in NUREG-Series Publications

The OCIO staff sent a memorandum to NRR, RES, and NMSS on November 6, 2001, requesting that they review all current and future NUREG reports for the presence of post-September 11 sensitive information before authorizing that the reports are appropriate for public availability. Reports containing sensitive information will be returned to the originating office. The memorandum attached a list of 22 NUREG reports undergoing routine pre-print reviews by the OCIO staff.

The offices may respond to his request by sending their authorizations to e-mail address pubs@nrc.gov. The responsible agency officials must also document their decisions regarding the appropriateness of public availability by signing the agency's "Authorization to Publish a NUREG-Series Document" (NRC Form 426/426A).
