Subject: Re: Sensitive info

All that you list is as we agreed.

In addition, as we discussed the issue of docket numbers and access to the PDR is a policy issue. **NMSS believes that docket number should be removed for our web pages until the policy issue is resolved** so that we will have less to "clean up" later. As I understand it, we can add the docket number later. If this is a problem for today, let me know.

Happy holidays, susan

Susan -
Per our discussion, we will sanitize or kill these pages:

<http://nrcweb:300/waste/liw-disposal/diagram.html> - kill this page

<http://nrcweb:300/waste/liw-disposal/locations.html> - remove links to the facilities and exit signs (make the names into bold text)

<http://nrcweb:300/waste/spent-fuel-storage/locations.html> -kill this page until we remove the numbers in parentheses in table below the map

<http://nrcweb:300/waste/spent-fuel-storage/dry-spent-designs.html> - kill this page

<http://nrcweb:300/waste/spent-fuel-storage/diagram-typical-dry-cask-system.html> - kill this page
