Subject: Re: Sandia site

It is true that Nureg/cr-6672 (2000) has been removed. Nureg/cr-4829 (1987) was not: as noted in the attachment, it was the link in 4829, to 6672, that was to be disabled, not the text of 4829 itself.

I will direct Sandia to verify that 6672 does not exist on their website, regardless of the pathway.

Mark:

This request goes back to January, I have archived all my emails so I copied them into a wp file, PDR discovered the document out there - they informed CIO, CIO informed us, Sturz reviewed and said not to put it back in the PDR and pull it, soooooo after many back and forth email with Brach, Fran Goldberg and Myself, Brach agreed to have it pulled, and we were told by Jacobs it was pulled.
