Subject: List of Approved Docs

Lance, An advance of the list that will be sent to NRCWEB is attached. This list is part of the RES response to the OCIO's recent request for documents that can be posted.

The attached regulatory guides have been reviewed against Commission Guidance (dated January 25, 2002) for release of information to the public and have been found to not contain information that could provide a clear and significant benefit to a terrorist in a potential attack.
