Please take the indicated actions for the following two NUREG/CRs:

- 1) **Repost NUREG/CR-6656, "Information on Hydrologic Conceptual Models, Parameters, Uncertainty Analysis, and Data Sources for Dose Assessments at Decommissioning Sites"** [Electronic file is available from previous public web site]
- 2) **Post NUREG/CR-6767, "Evaluation of Hydrologic Uncertainty Assessments for Decommissioning Sites Using Complex and Simplified Models"** [Electronic file is attached (.pdf)]

These NUREG/CRs have been reviewed based on information in COMSECY-01-0030 (January 25, 2002) which provides the latest Commission guidance to the staff on development of criteria for release of information to the public. Based on these sensitivity reviews, it has been determined that the contents of NUREG/CR-6656 and NUREG/CR-6767 do not contain information that could provide a clear and significant benefit to a terrorist in a potential attack. The result of the review (attached) has been approved by Farouk Eltawila (D:DSARE), the cognizant RES Division Director.

NUREG
Thanks,
Gil Millman
