Subject: Re: Request for OSRE results

I called Glenn and he indicated that he could provide us with a table indicating when the most recent OSRE was done for each plant. This will ensure that we identify and copy the correct document for each plant. As soon as that table is delivered, we will find and print the relevant documents and deliver them to Glenn.

John, the copies of the OSRE documents that we copied and hand delivered to you today are likely a subset of the documents that Beth is requesting. Do you still have those documents or should we print them again?

John Craig 09/26/01 01:36PM >>>
Beth,
I understand that Lynn is getting the documents that OPA requested. I've asked Glenn Tracy to take a quick look at them to make sure that they should be available to the public. He'll give them to OPA after that, and any that should not be public, he'll contact Lynn to have pulled. I think it will be a pretty quick process since the transmittal letters are pretty straightforward.
John
