NUREG - 1738 - Technical Study of SFP Accident Risk at Decommissioning Nulcear Power Plants Adams
ML010430066

Due to the events of 9/11 the above report was removed from the NRC website and its ADAMS profile was changed to non-publically available. However, there are two other versions of the report (they are technically identical to the NUREG except for formating changes to make the study a NUREG) in ADAMS that are still listed as publically available.

Considering the fact that NUREG -1738 is not publically available, shouldn't the other two versions be changed to being non-publically available. The other two versions can be found under the following ADAMS Numbers:

ML010160522

ML003762963

Let me know if you have any questions.
