Subject: Re: Remove Information From the Web & ADAMS

Lynn,
For now, please just pull the emergency plans of specific facilities that are on ADAMS (and for the web staff, those that might be on the web). We can expand our search later if the need arises.
Thanks,
Mindy

Mindy,
All requests regarding searching for and removing documents from ADAMS or the Public Document Room should be directed to me rather than Fran.

We will need more specific information on what you are looking for to ensure that we conduct a complete search. Prior to ADAMS the PDR had a classification system for its documents. Category F for nuclear reactors and fuel reprocessing plants was where we filed documents related to Security, Medical, Emergency, and Fire Protection Plans. Documents in this category include:

- Fire hazard protection plans and surveys
- Plant evacuation correspondence
- Safeguard contingency plan,
- Health physics program and its review
- Emergency implementing procedures
- Emergency action levels
- Emergency plans
- Supplements, changes, revisions to these plans and related correspondence
- Correspondence and documentation related to guard training, emergency centers, and emergency preparedness
- Documentation on security, non-operator fitness procedures, employee unescorted access and related correspondence.

When we did a search of BRS for Category F materials alone, we came back with a hit list of 5,400 documents. And there will also be relevant materials in other docket files and non-docket files.

Once the results of the search are conducted, we will want to provide a bibliography of the documents for whomever the EDO designates to review and determine whether they should be removed from public access.

There are two types of material we have identified so far that should be pulled from the web immediately. One is the Plant Information Books located at www.nrc.gov/AEOD/pib/reactors. In addition, all emergency plans of all facilities should be taken off. I think most of these are in ADAMS...

Information in this record was deleted
in accordance with the Freedom of Information
Act, exemptions 5
FOIA/PA-2002-0256

AAA-1

the numbers I have are ML003675475 and ML003724083 as examples. Can you perform a search to determine which other emergency plans are located on the external web? It appears that we may need to search the external web and ADAMS for this type of information.

Walt -

OEDO has asked the safeguards people in NRR and NMSS to review all web material for information that could be helpful to terrorists. Please have someone on standby to pull it once they identify the info.
Thanks

Fran
